DEEP CAREER MAPPING

Arpita Bera

Aptitude, timing and the path with least resistance

CONSULTATION DETAILS

NATIVE

Arpita Bera

REPORT DATE

September 2026

DATE OF BIRTH

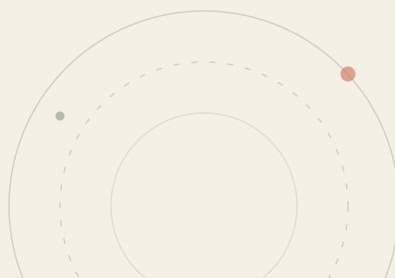

10 July 2000

TIME OF BIRTH

11:45 AM

PLACE OF BIRTH

Kolkata

• EXECUTIVE SUMMARY

Where things stand

This report looks at education and career through the astrological framework used by OrbitSage.

It has been prepared independently of the psychometric assessment. Psychometric scores have not been used to arrive at the conclusions below.

Astrology is an interpretive framework rather than a scientifically validated psychometric method, so this report should be read as an additional perspective alongside academic evidence, psychometric assessment and counselling.

• DETAILED ANALYSIS

Overall Learning Profile

Arpita's chart indicates a combination of analytical thinking, commercial orientation, communication ability and creativity.

The strongest underlying pattern is not purely creative or purely technical. It suggests an ability to understand information, work with multiple variables, communicate ideas and apply thinking to practical or commercial situations.

There is also a meaningful creative dimension, but creativity appears more likely to complement analytical or commercial work than necessarily require a purely artistic career.

• DETAILED ANALYSIS

Learning strengths

Strong indications are seen for:

- Analytical thinking

• DETAILED ANALYSIS

- Numerical and commercial reasoning
- Communication
- Pattern recognition
- Structured problem-solving
- Business-oriented thinking
- Ability to combine ideas from different areas

There is also support for:

- Creativity
- Visual/aesthetic awareness
- Digital or modern environments
- Presentation of ideas
- Unconventional approaches to problems

• DETAILED ANALYSIS

Education style

Arpita is likely to perform better when she understands the logic and application behind what she is studying rather than relying entirely on rote learning.

• DETAILED ANALYSIS

She may also question a chosen subject or specialisation if she stops finding it intellectually meaningful.

This means a change of direction should not automatically be interpreted as lack of capability. It may reflect a need for stronger intellectual or practical engagement.

• DETAILED ANALYSIS

School Stream

Primary indication: Commerce with Mathematics

This route appears particularly compatible because it combines numerical reasoning, commercial thinking, analysis and structured application.

Secondary indication: PCM / Computer Science

This is also viable, particularly where science is combined with technology, computing, data or analytical applications.

Third option: Economics-oriented Humanities

Economics, mathematics, data and related social-science combinations could also suit the overall profile.

Note:

PCB / Medicine would not be the first indication from this analysis.

A purely Fine Arts route would also not be the first recommendation despite the presence of creativity.

Graduation direction

The strongest areas to explore are:

- Finance
- Economics
- Accounting
- Statistics
- Business Analytics
- Business / Management

Also supported:

- Computer Applications
- Data Analytics
- FinTech
- Information Systems
- Technology-business combinations

• DETAILED ANALYSIS

A further interesting area is the intersection of creativity with business or technology, for example:

- Product
- UX / Consumer Research
- Data Visualisation
- Digital Business
- Brand Strategy

• DETAILED ANALYSIS

Higher education

Higher education and specialisation are supported.

Potential directions include:

- MBA
- Finance
- Analytics
- Economics
- Strategy
- Professional financial qualifications

• DETAILED ANALYSIS

Career orientation

Strongest career families:

- Finance / Banking / Investment
- Economics
- Business Analytics / Data
- Strategy / Consulting
- Business / Management
- FinTech / Product

Also worth exploring:

- Marketing Strategy
- Consumer Research
- Digital Product
- Technology
- Communication-heavy business roles

• DETAILED ANALYSIS

Areas requiring exploration

The chart supports both analytical-commercial and creative tendencies.

• DETAILED ANALYSIS

The key question is therefore not whether creativity exists.

The more useful question is:

Does Arpita want creativity to be the profession itself, or does she want to use creativity within a business, analytical or technology career?

This distinction should be explored through counselling and real-world exposure

• FINAL ADVISORY

Walking away with clarity

The strongest educational direction is Commerce with Mathematics, with PCM/Computer Science and Economics-oriented study as viable alternatives.

At graduation level, Finance, Economics, Accounting, Analytics and Management appear particularly compatible.

Technology-business combinations such as FinTech, Data and Product are also worth exploring.

Creativity should not be ignored, but it may work particularly well as a differentiator within an analytical, commercial or technology-oriented career.

THE PRACTICE

About Orbit Sage

The Practice & Philosophy

Orbit Sage is a modern guidance and decision-advisory practice founded by Lalita Aggarwal. By integrating Vedic planetary mechanics with psychometrics, behavioral science, and 25 years of corporate leadership experience, the practice identifies underlying human patterns to provide actionable clarity on education, career, business, and major life transitions.

Our Core Pillars

Pattern Intelligence

Understanding timing, cycles, and underlying personal dynamics rather than predicting passive outcomes.

Actionable Clarity

Providing structured, decision-support frameworks to move from uncertainty to confident direction.

Ethical Guidance

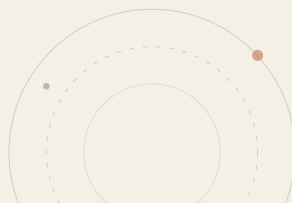

Guidance focused on self-awareness, personal agency, and practical lifestyle discipline — without fear-based or ritual-heavy approaches.

FOUNDER & CHIEF ADVISOR

Lalita Aggarwal

Twenty-five years of corporate leadership, now applied to human pattern work — translating charts, behaviour and lived context into decisions people can act on with confidence.

DISCLAIMER

This consultation is intended to offer perspective, clarity, and a deeper understanding of the patterns and possibilities indicated in your chart. Astrology is a framework for reflection and guidance rather than a guarantee of specific events, outcomes, or timelines. The insights shared are best used alongside your own judgement, lived experience and, where relevant, advice from qualified medical, financial, legal or other professionals. Ultimately, your choices and actions remain an important part of how any period unfolds.
